

WEB APPLICATIONS BY EXAMPLE

CLIENT, SERVER, DEVELOPMENT

Steffen Beyer

:clojureD 2015, Berlin

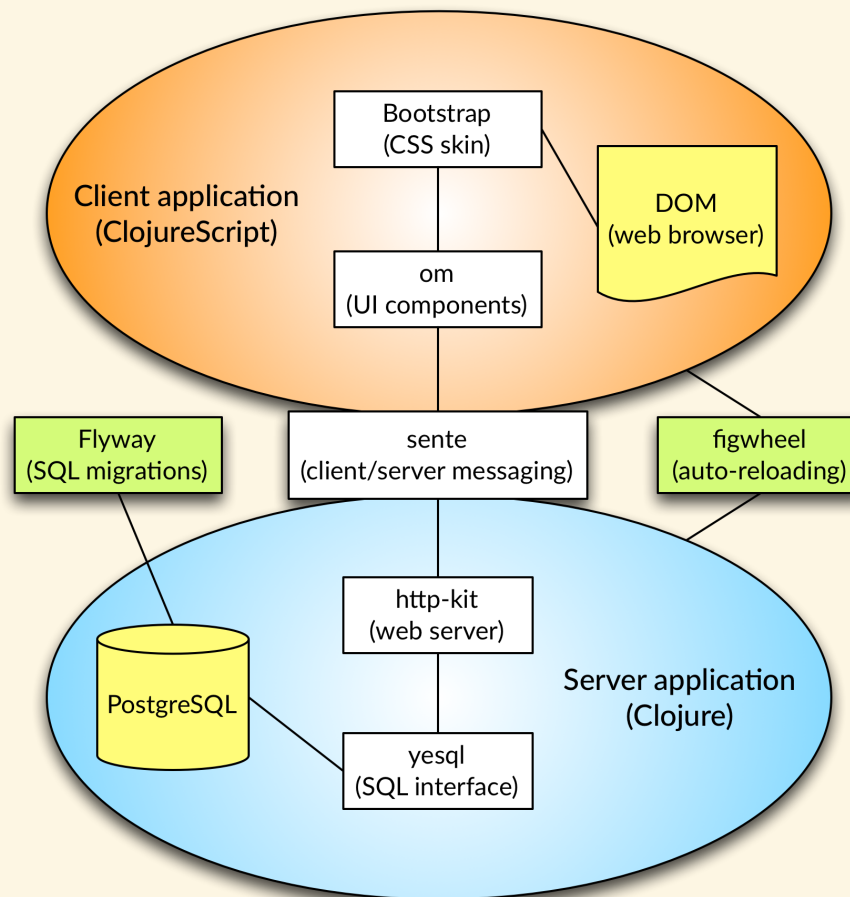

OUTLINE

1. Motivation
2. Application: ClojExCMS
3. Development environment: Light Table
4. Server side implementation
5. Client side implementation
6. Conclusion

LIVE DEMO

APPLICATION ARCHITECTURE

(in terms of libraries and building blocks)

LIVE DEMO

CONCLUSION

- ClojureScript feels mature
- Libraries feel powerful
- Light Table feels beta
 - There's only one *vim*
- ClojExCMS surely has issues

THANK YOU!

“You can tell whether a man is clever by his answers. You can tell whether a man is wise by his questions.” — Naguib Mahfouz
